FOAM-BLASTER

Antifoam-Defoam

FOAM-BLASTER is a premium grade, liquid de-foaming/anti-foaming agent designed for optimized foam control in **FRAC-ATTACK®** mixtures, and optimized for all water base drilling, work-over, drill-in and completion fluids. **FOAM-BLASTER** eliminates foam and entrapped air. **FOAM-BLASTER** is an excellent anti-foaming agent, for preventing aeration and foaming situations in low solids and brackish fluids.

FOAM-BLASTER is far superior to most common liquid defoaming agents and the mixture of Aluminum Stearate in diesel oil. **FOAM-BLASTER** is water dispersible and effective controls foam and aeration tendencies at any pH.

BENEFITS:

- Effectively controls/eliminates foam in all densities of water base drilling mud
- Works in both solids laden drilling mud and solids-free fluids systems.
- Extremely effective in mixing **FRAC-ATTACK®**
- Mixes easily - Can be mixed through the rig-mixing hopper.
- Can be splashed over the surface of the pits.
- Requires no special mixing equipment or facilities.
- Is economical and very effective in smaller quantities.

APPLICATION:

- For use in **FRAC-ATTACK®** Pills:
 - 1 bucket of **FOAM-BLASTER** for every 2 pallets products mixed
- Prevention/Control of Foam and aeration
- For Water Base Mud Systems:
 - 0.010 - 0.050 Gal/Bbl of **FOAM-BLASTER**
- Brine/Completion Fluid Systems:
 - 0.025 - 0.050 Gal/Bbl of **FOAM-BLASTER**

PACKAGING:

- 5 Gallon Plastic Buckets
- Easy-pour spouts on each pail
- 12 pails per pallet
- 50+/- lbs per pail
- Shrink Wrapped for easy transport
